

ONLINE AND WEB ASSIST COURSES

The Online Learning Program is an educational experience that breaks the mold of the traditional classroom by offering educational opportunities and course enhancements over the Internet. Online learning adds flexibility and availability by allowing students access to course material twenty-four hours a day, seven days a week.

Our goal is to create an active learning environment through thoughtful and engaged activity. This is accomplished through the collaborative efforts of discussion and exchange among students and your professor.

PREPARING FOR A COURSE

EXPECTATIONS

What are the expectations in an online course?

The same course demands and academic standards that are required in a classroom can also be found in an online course. Just as in a traditional classroom, students will follow a schedule as outlined in the course syllabus with deadlines for assignments.

Do I have to be on at a specific time?

Malone's online courses are delivered with flexibility in mind thus you are not required to be online at a specific time of the day. However, all online courses require that work be completed within a particular time frame. It is recommended that you access your course every day to engage the learning material, to participate in online discussions, and to complete assignments and exams.
